Cognizant Contributes $2 Million to Help Establish Trust & Safety Foundation

Cognizant today awarded a $2 million grant to the Trust & Safety Foundation (TSF), a newly-formed non-profit organization working to advance research and improve society's understanding of trust and safety online.

This marks the first grant made as part of Cognizant's October 2019commitment to fund research aimed at reducing users' exposure to objectionable online content. Cognizant's contribution will help TSF launch its initial projects aimed at developing multidisciplinary research and promoting understanding about the work done by online trust and safety professionals.
