

Cognizant Cited as a Leader in Workplace Services in North America by Independent Research Firm

Cognizant noted for compelling vision for the future of workplace services, top score for three out of four client feedback categories, and well-articulated strategy

TEANECK, N.J., May 7, 2013 [PRNewswire/](#) -- [Cognizant](#) (NASDAQ: CTSH) today announced it was named a "Leader" in the "The Forrester Wave™: North American Workplace Services, Q2 2013," published April 30, 2013 by Forrester Research, Inc.

"An increasingly consumer-driven end user computing environment is transforming what was once known as desktop management into a new category of services that we call workplace services. The importance of the conventional desktop device is diminishing in the face of a technology explosion involving SMAC (social, mobile, analytics and cloud) technologies across geographic regions," the report stated.

The report evaluated and scored Cognizant on the basis of a comprehensive methodology across 34 criteria relating to current offering, strategy, and market presence. Cognizant was among the vendors to receive the highest possible scores for vision for workplace services, client feedback on account management, service quality, and general satisfaction, planned enhancements, and investment to support strategy categories.

"Cognizant's vision for workplace services is aligned with its overall 'Future of Work' philosophy," the report stated. Cognizant's "well-articulated strategy—including its investment in support strategy, a compelling vision for the future of workplace services, and a full slate of planned enhancements—highlight its workplace services offering and merits strong consideration for North American customers," the report added.

Cognizant's "Future of Work" philosophy is focused on new digital business capabilities, and collaborative, flexible and global approaches that forward-thinking organizations must embrace to respond to the industry shifts brought on by a new generation of globalization, highly distributed and virtualized business models, rapidly evolving SMAC technology architectures, and millennial workers and customers.

"We are pleased to have been cited by Forrester Research as a Leader in North American workplace services, and are especially pleased with our strong client references," said Robert Boles, Senior Vice President and IT Infrastructure Services Practice Leader at Cognizant. "We feel that Cognizant's ranking as a Leader in North America speaks to the strength of our vision for and deep understanding of workplace services that fulfill client need to modernize their IT capabilities and bring consumer IT models to users, while at the same time virtualizing infrastructure, and improving productivity through flexible, as-a-service business models. In helping clients build a roadmap for the future, our unique workplace services approach connects people, processes and technology to deliver a more flexible infrastructure that is adaptive to the converging forces represented by global and virtual business."
