Cognizant Life Sciences Chief Technology Officer Appointed to Brown University Advisory Committee

Cognizant Corporate

Bryan Hill, Chief Technology Officer, Cognizant Life Sciences, has been appointed to Brown University's Executive Master in Science and Technology Leadership (EMSTL) Advisory Committee. Hill joins a distinguished group of executives from science, technology and engineering fields who are known for successfully facing the challenges of competing in today's complex global economy.

As a committee member, Hill will provide insight into the demands of the fast-paced, global tech environment. He will also help ensure the program offers students timely business and industry knowledge and that it fosters the development of essential leadership skills.

The EMSTL program prepares professionals working in science and technology domains to be global leaders who drive innovation and corporate success. Program participants move beyond technical expertise by developing their leadership capacity to broaden their impact and achieve success for their companies and in their careers.

A recognized thought leader on topics such as digital trends, application modernization and product design, Hill helps life sciences companies apply innovation across the enterprise. He is a co-founder of Cadient, a digital marketing agency acquired by Cognizant in 2014, and has more than 20 years' experience in software development, digital communications, user experience design, marketing and management consulting.
