Cognizant Deploys Electric Vehicles at its Hyderabad, India Campus

Cognizant Corporate

In its continued commitment to the environment, Cognizant has deployed Electric Vehicles (EVs) from Tata Motors at its Hyderabad campus.

The vehicles, given by Tata Motors, will provide associates with safe, environmentally friendly transportation to and from work. Tata Motors has partnered with Volercars, which will provide on-ground operations and fleet management. A batch of 10 vehicles was handed over by Tata Motors team to company executives at an event held in Cognizant's Hyderabad campus.

Ramkumar Ramamoorthy, Executive Director, India, Cognizant, said, "At Cognizant, reducing our carbon footprint through efficient use of energy and protecting vital, irreplaceable resources are at the heart of our environmental stewardship initiatives. We are proud to lead by example and be one of the first companies in India to embrace the potential of electric vehicles as an innovative meeting ground of energy and mobility."
