

Enterprise Innovation, APAC: Preparing for the Future of Work

"In the face of the unknown future, businesses and higher education institutions will need to engage in more flexible partnerships, quicker responses, different modes of delivery and new combined-skill programs to reliably prepare people for what comes next – to remain competitive amidst the transformations and disruptions of our new machine age."

Excerpts from Enterprise Innovation's article:

"Cognizant has released a Future of Learning report, based on a global survey of 601 top business executives at leading companies and 262 higher education institutions (HEIs) – to uncover detailed insight into the changes these entities are making in their training and educational programs, and the challenges they face in preparing tomorrow's workforce.

The research reveals the following key trends, the impact of which will soon ripple throughout businesses and across the higher education industry:

Preparing the workforce for future jobs is a matter of survival for both businesses and HEIs

- Businesses are beginning to bear the burden of learning
- The work ahead means working together
- Emerging technologies such as AR/VR and AI will supercharge learning by focusing on 'how to learn' over 'what to learn'
