Computable, Netherlands: Cognizant and TU Delft Announce New Research Alliance

Excerpts from Computable's article:

"The American-Indian service provider Cognizant Technology Solutions has entered into a collaboration with TU Delft. Through a research initiative, the organizations will work on finding and implementing solutions for advanced future technological issues such as the internet or robots, hyper-sensing, secure IoT and haptics (sensory technique).

Within this context, PhD and postdoctoral researchers at TU Delft, under the leadership of the Electrical Engineering, Mathematics and Computer Science faculty (EEMCS), will collaborate with Cognizant researchers and senior engineers."
