

Cognizant's Sriraman Nagarajan Named to 2019 PharmaVOICE 100

Recognized in the category of Driving Technology Transformation, Cognizant's Sriraman Nagarajan, Vice President, Life Sciences, has been named to the 2019 PharmaVOICE 100 Most Inspiring People.

An annual list of leading professionals in life sciences, the PharmaVOICE 100 recognizes those who stand out for the positive impact they have on the industry. Sriram's commitment to his clients is one of many reasons for his appearance on the list this year. With one client in particular, he was able to work with executives to make a shift from an internal focus to one on the patient. This not only brought about innovation that improved the quality of care, but also ultimately resulted in innovation focused roles being named at the client.

"I'm pleased to be a part of the PharmaVOICE 100 this year," said Nagarajan. "The work my team and I do with our clients gives us the ability to impact patients globally. It's an honor to be able to contribute in such a significant way."

"This special issue, now in its 15th year, has become one of the most-anticipated publications of the year, and it is our extreme pleasure to once again showcase the men and women who are providing exemplary leadership, driving change, innovating in the clinic and the market, and fostering relationships to position the industry in the best way possible to serve the ultimate stakeholders: patients," said Taren Grom, Editor and Cofounder of PharmaVOICE.
