Cognizant Achieves Amazon Web Services SAP Competency

Cognizant has achieved the Amazon Web Services (AWS) SAP Competency status, joining a select group of organizations with this distinction. The designation recognizes Cognizant as an AWS partner that has demonstrated technical proficiency and proven success in SAP implementation, migration, and innovation on AWS cloud. Certified AWS SAP Competency Partners have the experience, tooling, methods, and best practices to streamline client migrations or transformations.

Cognizant's experience in SAP on AWS hosting includes consulting, infrastructure services, architecting and executing SAP adoption on AWS, and technical operations. Along with increasing innovation, Cognizant's SAP on AWS cloud solutions help businesses enable digital core on cloud, thereby transforming their SAP landscape into an agile, cost-efficient, scalable, and secure platform. Client outcomes include reducing IT operational costs by 60%, reducing time to market, and improving recovery of core business applications through better disaster recovery.

"We are pleased to have earned the SAP Competency status as an AWS Premier Consulting Partner," said Sandeep Tambaku, SAP Practice Delivery Head, Cognizant. "This achievement is a testament to Cognizant's success implementing SAP AWS for organizations around the world, transforming their SAP ecosystems into modern digital enterprises. It will also help us serve our clients through the Migration Acceleration Program with AWS."
