# Healthcare IT Users Recognize Cognizant as 2021 Best in KLAS for Payer Claims and Administration Platforms According to KLAS Research

Cognizant has been named the “2021 Best in KLAS for payer claims and administration platforms by healthcare research firm KLAS Research.

Cognizant’s recognition is based on client feedback from the past 12—18 months on two of its technology solutions, QNXT and Facets, and caps a year spent positioning the company's forward-looking, next generation core platform investments with clients and industry influencers.

Cognizant continues to deploy enhancements to accelerate value for clients and is now investing more than $100 million per year in research and development of its healthcare software platforms. These enhancements gave QNXT and Facets the lift to outplay competitors such as HealthEdge, Conduent HSP, Advantasure, Epic and SS&C/DST.

KLAS Research will host a virtual awards ceremony on Tuesday, February 23 from 11 a.m. to 12:30 p.m. ET, at which time Cognizant will be recognized as a leader in digital healthcare solutions. The “Best in KLAS Awards” recognize software and services vendors that have the broadest operational and clinical impact on healthcare organizations.

“Each year, thousands of healthcare professionals across the globe take the time to share their voice with KLAS. The “Best in KLAS” report and awards set the standard of excellence for software and services firms and serve as a signal to provider and payer organizations that they should expect excellence from the winning vendors,” said Adam Gale, President, KLAS Research.

“It’s an honor to be recognized by KLAS for our healthcare solutions,” noted Surya Gummadi, Cognizant Senior Vice President and Global Head of Healthcare. “As large healthcare payers look to transform their business models to provide their members with complete access to value-based care and improved health outcomes, Cognizant is standing by as their strategic partner with the expertise and digital capabilities necessary to meet this essential need.”
