

Cognizant Commits \$250,000 to COVID-19 Relief Efforts in Latin America

The health and well-being of our Cognizant associates and their families worldwide remains our top priority. Latin America currently has some of the world's highest COVID-19 infection rates, and because regulations in many Latin American countries do not allow Cognizant to establish vaccination centers or emergency care units as we did in India, we are providing \$250,000 in relief funding for the region.

Our donations to the following humanitarian organizations will provide communities with support in areas such as medicine, food and education:

- Medecins sans Frontieres/Doctors Without Borders (Brazil)
- UNICEF (Argentina)
- Glasswing International (El Salvador)
- Direct Relief (Mexico)

The relief funding in Latin America is one aspect of Cognizant's COVID-19 response globally. Learn more about Cognizant's actions, including the launch of Operation C3 – Cognizant Combats COVID-19 – [here](#).
