Cognizant Wins Two UiPath Partner of the Year Awards

Cognizant has been awarded two partner awards from UiPath, a leading enterprise automation software company. The partner awards include Worldwide Business Process Outsourcing (BPO) / Managed Services Partner of the Year and Regional (Americas) BPO/ Managed Service Partner of the Year**.** The awards, which were presented during UiPath's annual FORWARD 5 conference in Las Vegas, Nevada, recognized leading partners who have proven outstanding results in innovation, growth, implementation, and community contribution.

Partners were evaluated on their ability to implement automation technologies, adopt new products and deliver results for clients. Cognizant was selected out of 5,000 active UiPath partners globally to receive these recognitions.

"The UiPath BPO/MS Partner of the Year award recognizes partners that use the UiPath platform to transform digital operations for business clients in their respective markets, bringing increased efficiencies and innovation," said Jay Snyder, Senior Vice President, Global Head of Customer Success, and Partners at UiPath. "Cognizant is a valued long-term partner of UiPath with multiple years' success working with our automation solutions. We are pleased to honor them in 2022 with the Partner of the Year awards."

"Through our partnership with UiPath, we are designing and implementing innovative intelligent process automation solutions that are helping clients accelerate the pace of transformation, boost business productivity and enhance customer and employee experience across business operations," said Girish Pai, Global Head Cognizant Automation. "These awards reinforce our continued success in helping businesses build and run modern operations and underscore the importance of having valued technology partners at our side."

UiPath is a key partner for Cognizant in delivering end-to-end platforms for automation that include Robotic Process Automation (RPA) as well as a full suite of capabilities designed to help organizations modernize their businesses through digital technologies.
