Everest Group Names Cognizant a Leader for its Data and Analytics Services

For the third consecutive year, Cognizant has been recognized as a Leader by Everest Group in its *Data and Analytics Service Providers PEAK Matrix® Assessment 2022*.

As part of this assessment, Cognizant was highlighted among 30 global IT service providers across the globe for strengthening its cloud partnership ecosystem by creating dedicated hyperscaler business groups that drive cloud data modernization across key vertical industries. Cognizant was also noted for its capabilities in IP-led Data and Analytics services delivery strategy. To propel this strategy, Cognizant has secured several patents, including migration of legacy systems to cloud, as well as implementation of AI, data reliability, data access, and visualization.

One area that Cognizant is increasingly leveraging data and analytics in is the energy sector to help companies improve efficiencies and safety, while facilitating the increase of renewable energy. For example, Cognizant is helping TGS develop solutions for energy companies to access and analyze data to explore for hydrocarbons, classify carbon storage, and assess the best sites for wind energy projects. The optimization of data and digital technologies is enabling TGS to transform its business into a reliable energy source that is reducing carbon emissions for its customers.

“Our clients continue prioritizing the intelligence value of data for delivering business agility and innovation,” said Naveen Sharma , Service Line Executive, Cognizant AI, and Analytics. “Everest Group’s recognition of our strengths in cloud ecosystems, IP-led delivery strategy, AI platforms, and DataOps validates our solutions supporting clients across industries to help them utilize the full potential of their data.”
