Cognizant Named to Fortune's America's Most Innovative Companies 2025 List

Company recognized for product and process innovation and culture for the third consecutive year

TEANECK, N.J., March 26, 2025 /PRNewswire/ -- Cognizant (Nasdaq: CTSH) today announced that it has been recognized on Fortune's list of "America's Most Innovative Companies 2025". This prestigious award is presented by Fortune and Statista Inc., the world-leading statistics portal and industry ranking provider, and recognizes organizations that lead the charge in fostering creativity, advancing technology, and driving transformational change. The awards list was announced on March 26, 2025, and can be viewed on the Fortune website.

Fortune and Statista selected America's Most Innovative Companies 2025 based on product innovation, process innovation, and innovation culture. For the evaluation of the innovation culture and the internal view of process innovation, Statista deployed online surveys where employees could score their own company on a scale system. Statista surveyed recruiters, management consultants, and patent attorneys to evaluate the external view of process innovation and product innovation. Statista also cooperated with LexisNexis PatentSight and used its platform to analyze the quantity and value of a company's patents. The 300 companies with the highest score were awarded America's Most Innovative Companies 2025.

"Cognizant is proud to be named one of America's Most Innovative Companies for the third consecutive year by Fortune and Statista," said Surya Gummadi, President, Americas, Cognizant. "Over the last few years, Cognizant has prioritized becoming an employer of choice, optimizing operations, and accelerating growth—all while empowering our associates to drive grassroots innovation. That momentum is fueling innovation across the organization and for our clients, positioning Cognizant to lead in the AI era."

Statista publishes hundreds of worldwide industry rankings and company listings with high-profile media partners. This research and analysis service is based on the success of statista.com, the leading data and business intelligence portal that provides statistics, relevant business data, and various market and consumer studies and surveys.
