TEANECK, N.J., May 18, 2026 /PRNewswire/ -- Cognizant (Nasdaq: CTSH), a leading AI builder and technology services provider, today announced that its Board of Directors has authorized a \$2 billion increase to its existing share repurchase program, and that it has increased its share repurchase target for 2026 to \$2 billion, an increase of \$1 billion over its prior expectation. The additional \$1 billion in share repurchases are expected to be completed during the second quarter of 2026.

Share Repurchase Target  
by \$1 Billion to \$2 Billion

"Our plan to increase the amount of share repurchases reflects our strong conviction in the long-term opportunity AI creates and our critical role in it as an AI builder," said Ravi Kumar S, CEO. "We believe a fundamental shift in the IT services is underway, one that strengthens Cognizant's position for future growth. We believe our current share price significantly undervalues those prospects. I am confident that our early investments will position us to emerge as a leader in AI-led enterprise transformation in the years ahead."

"A strong balance sheet and robust free cash flow give us the flexibility to opportunistically accelerate the return of capital to shareholders while we continue to invest for growth, including through strategic M&A," said Jatin Dalal, Chief Financial Officer.

### Return of Capital to Shareholders

On May 17, 2026, the Board of Directors approved an increase of \$2 billion to the amount authorized under the Company's existing stock repurchase program. With this increase, as of May 17, 2026, there is approximately \$3.45 billion remaining under the share repurchase authorization. For 2026, the Company is increasing its share repurchase expectation by \$1 billion to \$2 billion. In connection with this plan and given the anticipated closing of our previously announced acquisition of Astreya, the Company will draw down \$1 billion from its existing revolving credit facility. The Company reiterates its long-term capital allocation framework, including the flexibility to pursue strategic acquisitions.
