

Cognizant Named a Leader and Star Performer in Everest Group's Oracle Cloud Applications Services PEAK Matrix® Assessment 2026

Recognition highlights Cognizant's AI-led Oracle delivery platforms, industry-specific solutions and domain consulting depth in a US \$18.6 billion services market

October 1, 2026 – Cognizant (NASDAQ: CTSI) today announced it has been named a Leader and a Star Performer in the Everest Group Oracle Cloud Applications Services PEAK Matrix® Assessment 2026. Cognizant was recognized among 25 leading Oracle Cloud Applications (OCA) services providers evaluated in the assessment, and is one of the seven providers positioned as a Leader.

Everest Group evaluated providers on two dimensions, market impact and vision and capability, across consulting and advisory, implementation, and maintenance and support services spanning Oracle ERP Cloud, Oracle CX Cloud, Oracle SCM Cloud, Oracle HCM Cloud, Oracle EPM Cloud and Oracle Industry Cloud solutions. According to the report, Leaders are characterized by their ability to execute large-scale, complex, end-to-end OCA services, underpinned by a strong delivery network and robust partner ecosystem. Everest Group confers the Star Performer title on providers demonstrating the strongest year-over-year improvement on the PEAK Matrix®, based on parameters including revenue growth, new contract signings, innovation, scope of services offered and expansion of delivery footprint.

The assessment recognized Cognizant's expertise serving clients across banking and financial services, insurance, manufacturing, as well as travel and transport. It also highlighted industry-specific Oracle solutions, including Franchise Collaboration Hub, Surface Transport Management, Healthcare in a Box, which support hospitality, transportation, healthcare engagements. Clients cited domain expertise and account management as key strengths in Cognizant's OCA transformation programs.

"Organizations today expect technology investments to deliver continuous business value. We have built our Oracle practice around that expectation, combining deep industry expertise, AI-led delivery platforms, and industry-specific accelerators to help clients modernize faster, realize value sooner, and continuously innovate beyond go-live. Being recognized by Everest Group as both a Leader and a Star Performer reflects the success our teams and clients have achieved together," said Mohammad Haque, Global Head of Intelligent Enterprise Platforms and Large Deals, Cognizant. "Looking ahead, Cognizant is focused on transforming enterprise operations through agentic AI in processes such as finance, supply chain and human resources. Together with Oracle and frontier companies, we are helping clients build intelligent, adaptive, and future-ready enterprises."

"Legacy modernization, AI-enabled workflows, and industry-specific outcomes are shaping demand for Oracle Cloud Applications services as enterprises seek partners that combine domain consulting depth with AI-led execution across the enterprise. The services market, valued at approximately US \$18.6 billion and growing at a double-digit rate of around 12%, reflects this shift as service providers restructure delivery from implementation-led models toward integrated practices that combine domain-specific advisory, preconfigured industry IP, and outcome-linked commercial constructs. Stronger alliances with Oracle and hyperscalers, coupled with AI embedded in domain-specific delivery, are emerging as key differentiators, enabling providers to convert platform capabilities into measurable business outcomes for enterprises," said Yamohideen AS, Vice President, Everest Group. "Cognizant's experience in supporting OCA transformations is complemented by its investments in AI-led delivery platforms such as AppLens™, Ora0, and Neuro AI, which strengthen delivery automation. Clients also resonate with Cognizant's domain expertise and account management capabilities in OCA engagements. Taken together, these factors contribute to Cognizant's positioning as a Leader in Everest Group's Oracle Cloud Applications Services PEAK Matrix® Assessment 2026."
