Cognizant Selected by SITA to Deliver AI-Led Global Finance Transformation on the Cloud

Collaboration will help SITA create a Frontier Finance function - data-driven, innovative and focused on growth and measurable business value - using AI and new ways of working

AMSTERDAM and GENEVA, Oct. 6, 2026 /PRNewswire/ -- Cognizant (Nasdaq: CTSH) today announced that it has been selected by SITA, the world's leading specialist in air transport technology, as the implementation and transformation partner for SITA's SKY program. The groupwide, finance-led initiative will help SITA implement a modern cloud platform across finance, procurement and supply chain processes, designed to deliver measurable business value across SITA's global operations in more than 200 countries and territories.

The transformation is designed to move finance beyond reporting and operational processing, establishing it as a more strategic, growth-focused partner to the business. Cognizant will work with SITA to implement a cloud-based ERP and management platform spanning planning, performance, project management and procurement. By connecting these functions through a shared data foundation, consistent ways of working and AI-led insights, SITA aims to strengthen planning, identify opportunities earlier and align resources more closely with its growth priorities.

Cognizant's AI-first approach combines deep finance transformation expertise with generative AI implementation agents, informed by intellectual property developed through more than 800 cloud ERP projects. It draws on embedded platform AI capabilities and custom agents built using Cognizant's agentic AI capabilities to embed intelligence into planning, forecasting, project management and day-to-day finance activities — helping SITA accelerate delivery and put AI to work across live finance, procurement and project management processes.

"SITA's SKY program is a transformation program aimed at delivering strong business outcomes," said Nicolas Husson, Chief Financial Officer at SITA. "By standardizing core processes on Oracle Fusion Cloud and building AI into how we operate, we aim to create a more agile finance organization and a strong foundation for our next phase of growth."

"SITA plays a critical role in the global air transport ecosystem, and its growth requires an enterprise platform that can scale with the business, with technology and AI serving the strategy rather than defining it," said Saket Gulati, Senior Vice President and Head of Northern Europe at Cognizant. "By bringing together our cloud platform expertise, AI capabilities and end-to-end transformation experience, we will help SITA build a modern data and operating model foundation, embed new ways of working, and help translate technology investment into growth and measurable business value."

"Enterprise platforms are the backbone of how global organizations run, and SITA's SKY program is a great example of what's possible when that backbone is rebuilt for an AI-first world," said Roshan Subudhi, SVP and Head of Global Markets- Intelligent Enterprise Platforms at Cognizant. "By combining Agentic AI capabilities and our Oracle Fusion expertise, we're not just modernizing systems — we're helping SITA reimagine how finance, procurement and supply chain teams work together, so the business can move faster and make smarter decisions at scale."

About Cognizant

Cognizant (NASDAQ: CTSH) is an AI builder and technology services provider, building the bridge between AI investment and enterprise value by building full-stack AI solutions for our clients. Our deep industry, process and engineering expertise enables us to build an organization's unique context into technology systems that amplify human potential, realize tangible returns and keep global enterprises ahead in a fast-changing world. About SITA

SITA is the air transport industry's tech engine, making travel safer, easier, and more sustainable for everyone. From the earliest days of commercial aviation to today's digital frontiers, SITA has been there, connecting the industry and helping it

evolve through every leap forward.

With around 2,500 customers, SITA technology supports over 1,000 airports and more than 19,600 aircraft worldwide. It also helps over 70 governments strike the balance between secure borders and seamless journeys. Behind the scenes, SITA bridges 45–50% of the industry's data exchange, enabling a highly complex global network to operate smoothly and reliably, every step of the way.

SITA is transforming fast. From advanced self-service and operations control to airport design and digital borders, it is shaping the next generation of travel through key acquisitions like Materna IPS, ASISTIM, and CCM. It is also expanding beyond aviation with initiatives such as SmartSea, bringing its trusted technologies to cruise, rail, and urban air mobility.

This transformation is about more than new products. SITA is investing in the right skills, tools, and partnerships to help the industry move with greater intelligence and agility, bringing together smart systems, seamless data, and sustainable innovation. Because as global travel surges, flow is everything.

As part of its bold climate strategy, SITA is cutting emissions by 4.2% each year and targeting net zero by 2050. SITA's science-based targets are validated by the SBTi, and its growing portfolio is helping customers reduce their own carbon footprints too.

Owned by the industry and driven by its needs, SITA operates in more than 200 countries and territories.
