

Cognizant Earns New Pegasystems Partners Global Elite Distinction

Cognizant has earned the Global Elite distinction and Specialized partner status from Pegasystems in their new [Pega Partners program](#). This honor is reserved for Pega partners who demonstrate capabilities in Pega technologies, engagement strategies or vertical markets. Cognizant earned this honor, in part, due to its Pega certifications globally, which demonstrate a high understanding of Pega's software.

Key achievements contributing to Cognizant's recognition include:

- Delivery Excellence: met the target on sales bookings for 2021 and implemented several end-to-end enterprise programs on Pega software
- Launched micro-Centers of Excellence focused on Intelligent Automation, Customer Engagement and Cloud computing

Cognizant has been working with Pegasystems for over 23 years, with partnership initiatives spanning all of Cognizant's business industries and geographies. A dedicated digital innovation center was created by Cognizant in Mesa, Arizona to drive innovation and thought leadership for clients of all sizes. The center serves as the headquarters of the Pega Center of Excellence for the Americas.

"We're pleased to earn this Global Elite distinction and trust from Pegasystems, which demonstrates to our clients that we can deliver top-notch intelligent automation and customer engagement solutions from Pegasystems that drive results," said Raju Rampa, Vice President and Pega Practice Leader, North America, Cognizant Technology Solutions. "With our strong expertise and knowledge of Pega's products and solutions, we can readily identify the right solutions and quickly implement them to accelerate our client's digital transformation initiatives across industries."

"We're extremely pleased to recognize Cognizant as a Global Elite partner with specialization on the growth industry verticals," said Luke von Schreiber, Vice President, Global Partner Management, Pegasystems. "Cognizant has been our longest serving partner with continued delivery excellence, contributing to the growth of the global Pega ecosystem."
