Cognizant Global Digital Engineering Leader Andres Angelani Recognized Among Crain's Notable Hispanic Leaders and the HITEC 100

Andres Angelani, SVP and global head of digital engineering at Cognizant, has been named toCrain's New York Business' 2022 Notable Hispanic Leaders, a special editorial feature that recognizes top Hispanic professionals in New York for their accomplishments and their record of powering change. Additionally, the Hispanic IT Executive Council (HITEC), which celebrates the leadership and achievements of the top Hispanic professionals in all sectors of the technology industry from across the United States, has named Andres to the 2023 HITEC 100 list of the most influential and notable Hispanic professionals in the technology industry for the fourth consecutive year.

"Growing up in a small town in Argentina, I was fortunate to have family and mentors who helped instill at an early age the importance of hard work and leveraging experiences that create purpose and community for yourself and others," said Angelani. "It's an honor to be recognized among the HITEC leaders again this year, and to be named to Crain's Notable Hispanic Business Leaders. I appreciate and applaud culture that Cognizant continues to build around diversity and inclusion, and look forward to continuing to help foster that environment."
